NEW INTAKE MANIFOLDS IN RANGE

PLASTIC INTAKE MANIFOLDS WITH FLAP ADJUSTMENT

With Pierburg's OE expertise in air supply, Motorservice has extended its product range with a series of intake manifolds with flap adjustment.

These plastic intake manifolds have been developed to OE specifications and supplement the existing range of magnesium and aluminium intake manifolds.

Previously, many of these parts could only be purchased from an OEM along with all the attachments. In many cases, Motorservice now offers the actual intake manifold separately as a spare part.

THE REPAIR SOLUTION

Damage to an intake manifold is often due to carbonised or worn out flaps.

The attachments, such as drive modules and solenoid valves, are generally still completely fine.

So you only have to replace the actual faulty component. This enables you to repair faulty components on plastic intake manifolds cost effectively – using quality parts from a premium manufacturer.

Flaps on the intake manifold

The Motorservice range also includes compatible attachments for specific intake manifolds, for example electric drive modules.

Abbreviations & legend:

SR = Intake manifold

EAM = Electric drive module

1) These item numbers cannot be ordered; only supplied in parts list.

The item numbers are intended to link the vehicle manufacturer reference number to the components that make up the complete intake manifold module.

You can order these components separately from Motorservice.

2) Individual component as per parts list

3) Intake manifold 7.10131.00.0 including original flap potentiometer and switchover valve 7.03280.04.0.

All content including pictures and diagrams is subject to change. For assignment and replacement, refer to the current catalogues or systems based on TecAlliance.

* The reference numbers given are for comparison purposes only and must not be used on invoices to the consumer.
