

# CIRCLIPS MADE OF POLYAMIDE FOR AXIAL JOINTS

TECHNICAL INFORMATION NO.: 1095

## AFFECTED VEHICLES:

<b>Renault</b>	Clio II+III, Kangoo
<b>Nissan</b>	Kubistar, Mikra (...K12)

## AFFECTED ARTICLES:

Ruville No.	OE No.
915597	7701472120 4852100QAG
915582	7701475841

## INSTALLATION INSTRUCTIONS:

- Replace the circlip every time after it has been removed.
- Allocation according to the colour of the ring

## IMPORTANT NOTE:

Note the specifications of the vehicle manufacturer!

Some models by Renault and Nissan are fitted with an OE circlip consisting of a polyamide ring to retain the axial joint. The polyamide ring gets squashed during installation and therefore always has to be replaced every time it is removed.

Furthermore, replacement of the circlip is a mandatory OE requirement.

As your service partner, RUVILLE therefore includes all corresponding polyamide rings with the respective axial joints.

The circlips are allocated correctly according to the colour of the removed ring.
