

QuickFlow

Fill-/Extraction Pump, universal

This practical hydraulic pump in a design suitable for use in workshops is used for pumping off or refilling and filling all non-easily flammable fluids, such as engine and transmission oil, radiator antifreeze, brake fluid, etc. The pump is either powered electrically, using a cordless screwdriver or alternatively also pneumatically using an air ratchet or impact wrench.

- suitable for all non-easily flammable fluids
- one-handed operation, second hand remains free for guiding the hose

- plastic guide and rubber band enable stable holding of different cordless screwdriver sizes
- lightweight, glass-fibre reinforced plastic casing on the outside and durable, wear-resistant pump mechanics made from metal on the inside
- quick couplings enable fast hose change
- positive self-priming behaviour
- delivered complete with 1/4" hex on 3/8" drive adapter and storage case

Operating Mode: For Electrical Tools
For Compressed Air Tools

Info: with quick couplers
