

CrimPro 30

Crimping Pliers

The crimping pliers CrimPro 30 fulfil the highest demands for quality and functional use. Intended for industrial use, different crimp sets can be used to process cross-sectional areas of 0.1 to 25 mm². Professional crimping precision for all common contacts thanks to linear die crimping. The double guide system guarantees an even application of clamping force and precise, torsion-resistant guiding in all profiles, thus ensuring that even the smallest tolerances are maintained. The unlockable positive lock and an integrated fold positioner enable optimal fixing of the contacts. An ergonomic soft-hand grip ensures fatigue-proof work.

Tools: Basic pliers without insert
