

# Antifreeze-/Battery Acid Testing Unit (Refractometer)

The most accurate way to check fluids. Determination of all ethylene glycol (ethanediol)-based antifreeze/water mixtures. Determination of the relative density of the electrolyte in car batteries. Determination of concentrations and properties of non-standardised fluids such as antifreeze agents for the windscreen washer system, special antifreeze agents, lubricating oils, oily emulsions, AdBlue urea.

- adjustment screw
- adjustable visual focus
- structured cover plate for optimum fluid distribution
- G12, G12+, G12++, G13

**Material:** Aluminium
