

Reanimator 4400

Start Aid Device

A professional assisted-start battery for daily workshop use. Our Reanimator is equipped with a leak-proof, AGM high-performance battery. The robust housing with clamp storage is made of polypropylene, is vented and free from rust and corrosion. The extremely shock-proof rubber base provides additional safety.

- on/off switch prevents short circuits on the cable clamps and discharging of the battery
- high-performance clamps with earth strap and copper jaws
- multi-function digital display
- acoustic reverse polarity protection

Rated Voltage: 12 V
24 V
for diesel engines 4000 cc
from capacity:
for petrol engines 7000 cc
to capacity:
Battery Capacity: 32 Ah
Gauge: with digital display
with load status display
with battery status indicator
Registration Type: CE approved
Cable Length: 1,59 m

Cable Cross Section: 33 mm²
Battery: AGM Battery
Terminal/Clamp: with USB socket
Weight: 18,54 kg
Info: with cigarette lighter socket
with fuse
Workshop Equipment: with reverse polarity protection
Combi Switch Function: On/Off Switch
Selector Switch
