

Stay cool - with thermal management from febi bilstein!

Each and every vehicle requires optimum water pump performance. Good coolant fluid circulation is key to ensuring that the engine runs smoothly. That's why you need top performance from us – in the development and production of modern water pumps with impressive product characteristics!

New technology is used in the 'switched' water pump 39741:

The electromagnetic coupling allows a tailor-made connection and disconnection of the drive which supplies the engine with the required amount of cooling in real time. Depending on the vehicle 0.5-1.5% increase in fuel efficiency can be achieved, this means around £400 savings after one year with less impact on the environment.

febi no. 39741

Reference no. 21969183
to fit Volvo Trucks FH, FM, (Euro 5/6 Engines)
