

Intercooler Hoses from febi bilstein

If an intercooler hose fails this results in a starvation of combustion gas to the engine. This effects the power available from the engine which on a fully loaded vehicle can reduce the speed to a crawl.

febi intercooler hoses are manufactured in layers to exacting standards and give high durability and oil resistant properties. The inner layer is designed to withstand high temperature gases at pressure and the outer layer is resistant to oil, fuel, coolant etc... that may come in contact while the engine is running and also during maintenance & repair.

febi no. e.g. febi 44299

to fit:
MAN KAT, ÖAF, F 90, L 2000, M 2000, F 2000, TGA, TGL, TGM, TGS, TGX, HOC,
Lion's, Lion's City, Lion's Classic, Lion's Coach, Lion's Regio, ND, NG, NL, SL, SÜ,
Neoplan Centroliner, Cityliner, Skyliner, Starliner, Tourliner, Trendliner

OE No. 81.96301.0900 S1

Important: febi's specialised intercooler hose clamps are critical to the durability of the hose. The special design allows for thermal expansion ensuring secure attachment in all conditions.

febi bilstein charger intake hoses and hose clamps are available individually or complete with clamps as a ProKit.
