

Transmission oil pump – to fit transmission ZF 16S

Just as the oil pump in the engine the transmission oil pump provides the necessary lubrication in the transmission. It generates an oil pressure in the transmission oil circuit, so that the transmission oil gets to the intended lubrication points, eg. bearings or gears. Thus, wear is minimized and the correct operation of the transmission is ensured.

If there is any doubt about the correct function check the oil pump and replace it if necessary. If the transmission oil pump fails, there is a lack of lubrication. The consequence is high wear and irreversible damage in the transmission after a short time.

febi bilstein offers the transmission oil pump 44572 to fit for the most sold transmission ZF 16S:

febi no. 44572

to fit:
DAF 75 CF, 85 CF, CF 75, CF 75 II, CF 75 IV, CF 85, CF 85 II,
CF 85 IV, 95 XF, XF 95, XF 105, F 75, F 85, F 95
Repl. no. 1326 911 S1

to fit:
IVECO EuroStar, EuroTech, EuroTrakker, Trakker AD, Trakker AT
Repl. no. 0 4253 1750 S1

to fit:
MAN KAT, ÖAF, F 90, M 2000, F 2000, TGA, TGS, TGX
Repl. no. 81.38520.0003 S1

to fit:
Renault Trucks Kerax, Premium, Magnum
Repl. no. 50 01 842 919 S1
