

Tried, tested and reliable – gas pressure springs by febi bilstein:

Gas pressure springs are used in many parts of the vehicle to make opening and closing, as well as lifting and lowering various elements easier. These include luggage compartment doors, berth cabins, bonnets, tailgates, driver seats and roof systems.

Several factors can significantly compromise the service life of a gas pressure spring. Apart from frequent use, major temperature fluctuations, dirt and resulting scratches in the piston rod lead to a reduced service life.

febi bilstein is an authorised distribution partner of OE supplier Stabilus, and offers an extensive range of gas pressure springs in OEM quality.

e.g. febi no. 47617

STABILUS

to fit:
MAN Truck TGA, TGL, TGM, TGS, TGX
Repl. no. 81.97006.0002

Subject to technical changes
