

OCTANE BOOSTER

OILS & CHEMICALS | 29008

Functions

The main function of this additive is to increase the octane number (RON) because of low-grade fuel quality. This optimizes combustion and increases engine performance.

Purpose

- increases the octane number by at least 7 to 20 octane
- increased throttle response, power and torque
- quiet idling, improved running smoothness of the valve train
- for road and racing operation
- eliminates knocking and ringing

SYMPTOMS

- engine jerks
- rough idling
- bad exhaust emissions
- loss of power
- increased fuel consumption

CONSEQUENTIAL DAMAGES

- engine damage due to deviating knock resistance
- injectors can be damaged

USAGE

- add to the fuel system before refueling
- for normal road use, use 1 can on a full tank
- for racing use up to 3 cans on a full tank
- suitable for all petrol engines
