Engine codes (Diesel): A13DTC, A13DTE, A13DTR, Y13DT, Y13DTH, Z13DT, Z13DTE, Z13DTH, Z13DTI, Z13DTJ, Z13DTR

Field of Application

Designed for the locking and positioning of camshaft, crankshaft, injection pump, timing chain tensioner and cam phase sensor disc. Also includes all the tools required for counter-holding the crankshaft.

An indispensable tool set when replacing a timing chain or performing repairs to the engine.

The reaction wrench that comes with tool set allows you to professionally counter-hold perforated injection pump sprockets and cam belt/chain sprockets (with hole Ø not smaller than 6.5mm) when loosening/tightening the central fastening bolt for example. The different interchangeable pins and the adjustable lever allow the tool to be adapted to various hole diameters and PCDs. Thanks to these features, the wrench is virtually universally applicable.
