

Marten odour remover

Specially developed cleaning foam for pre-treatment

Strongly recommended before using marten repellents! Easily removes the marten's scent mark, with no need for risky engine washing. Safe for electronic components as well as for paint, rubber and plastic.

When the engine is cool, spray the entire engine compartment as well as the underside of the bonnet and the mudguards thoroughly.

Use the whole can and allow the foam to take effect for a short while. Then simply rinse with water – no pressure washer or powerful water jet needed.

- › Highly adhesive active foam
- › Very easy to use
- › Safe for plastic, rubber and paint

Item code 07503 | Packaging: Spray can, 300 ml

⚠ Strongly recommended before using marten deterrents.
