

High temperature protective sleeving

For universal use – mechanical bite protection

Specially developed Aluflex glass fabric sleeve for cables connected to the catalytic converter, soot particulate filter and lambda probe. Extremely heat-resistant protective sleeve, protects against radiation heat of up to 800 °C without internal heat accumulation.

Strongly recommended before using marten repellents – STOP&GO odour remover, item code 07503.

- › Specially developed Aluflex glass fabric sleeve
- › Internal diameter 12.50 mm
- › Withstands radiation heat of up to 800 °C
- › Package of 4 x 0.50 m in mailing tube

Item code 07513 | Packaging: Mailing tube
