

Ultrasonic device with 2 speakers

Ultrasound with frequency modulation – connects to the on-board power supply – double action

Highly effective ultrasonic device connects to the on-board power supply. Frequency modulated ultrasonic tones mimic animal fear and warning cries, signalling extreme danger to the marten. No habituation effect.

Double acting marten repellent: Avoid acoustic shadow with two speakers. Especially suitable for compact engine compartments. Note: Ultrasound does not penetrate any materials.

Strongly recommended before using marten repellents – STOP&GO odour remover, item code 07503.

- › 12-volt connection
- › 2 waterproof piezo speakers
- › Dispersion radius: 360°
- › Dispersion angle: 2 x 160°
- › Sound pressure: approx. 105 dB
- › Frequency modulation to prevent habituation
- › Function control light, blinking or constant LED
- › Shock and splashproof
- › Very easy to install (pre-wired)
- › Maintenance free
- › Compatible with CAN data bus
- › E1 marking by the German Federal Motor Transport Authority (KBA)

Item code 07515 | Packaging: Folding carton
