

Battery-operated ultrasonic device

Ultrasound with pure tone technology – no need to connect to on-board power supply

Highly effective, battery-operated ultrasonic device. Frequency modulated ultrasonic tones mimic animal fear and warning cries, signalling extreme danger to the marten. No habituation effect. Operated with two AA batteries, making it independent of the on-board power supply. Approx. 12 months of operational life per battery set. Ideal for vehicles that remain parked for long periods such as classic cars, motor homes and exhibition vehicles as well as for carports.

Strongly recommended before using marten repellents – STOP&GO odour remover, item code 07503.

- › Operated with two alkaline AA batteries.
- › Batteries last up to 12 months
- › 1 waterproof piezo speaker
- › Dispersion radius: 360°
- › Dispersion angle: 160°
- › Sound pressure: approx. 85 dB
- › Frequency modulation to prevent habituation
- › Function control light, blinking LED
- › Shock and splashproof
- › CE marking

Item code 07580 | Packaging: Folding carton
