

Stay pumped – all along the journey. Spare parts for the ContiMobilityKit: the tyre sealant.

- > Replacement product of original equipment quality "Engineered in Germany"
- > Non-hazardous latex-based tyre sealant
- > Extended shelf life of up to five years
- Sealant bottle can be disposed of in household waste
- > No need to remove and replace valve core

www.continental-mobility.com

Extended movability in case of a puncture.

The tyre sealant is pumped by the Continental compressor into the tyre, enabling the onward journey to the nearest garage or tyre service (max. 80 km/h and max. 200 km). It seals car tyre punctures caused by nails or similar objects with a diameter of up to 6 mm.

Product contents:

> Pressure-resistant 450 ml tyre sealant bottle

Technical specifications of sealant bottle:

Sealant amount	Shelf life	Dimensions				
450 ml	5 years	Ø 87 mm × 125 mm				
Weight	Application temperature					
585 g	-30°C to +60°C					

Application for passenger car tyres:

The product can be used for the tyre dimensions which are shown in the following chart and with a required tyre pressure of up to 300 kPa (3 bar, 43 psi). 450 ml replacement bottles can be used as a replacement for ContiMobilityKit's 300 ml, 450 ml and 560 ml OE bottles (560 ml OE bottle depending on tyre dimensions - please see chart).
