STARTER MOTORS & ALTERNATORS

IMPORTANT PLEASE READ THE INFORMATION BELOW BEFORE RETURNING A NEW OR WARRANTY UNIT. FAILURE TO FOLLOW THE PROCEDURES BELOW MAY RESULT IN ADDITIONAL CHARGES BEING APPLIED

This part number is supplied packaged in a sealed plastic bag, with the plug also being protected by a foam cover.

When returning a new or warranty part, if you are reusing the packaging we have provided, the alternator **must be in a sealed plastic bag** before being packed into the box. Not sealing the unit in a bag will allow the shredded cardboard in the box to contaminate the alternator meaning it will have to be stripped and reworked once we receive it.

This particular alternator comes with a welded pulley which would then have to be removed to allow the unit to be reworked, this is a costly and time consuming process.

If you are going to be using your own packaging to return this alternator, please ensure it is packed thoroughly to prevent any damage to the alternator in transit.

Please note you will be liable for any damage or reworking charges caused due to insufficient or incorrect packaging.
